**MEMORANDUM FOR: THE RECORD****SUBJECT: Project Monitor at** [redacted]

50X1

1. **Time and Place of Meeting:** 2 February 1956, At [redacted]

50X1

50X1

2. **Attendance:** [redacted]

50X1

3. **Discussion:**

50X1

a. [redacted] briefed [redacted] on the security procedures followed by Agency contractors. After completing the briefing, [redacted] was taken on a tour of the plant facilities and shown the possible sites for Agency work. [redacted] will submit a separate report on the company.

b. The undersigned and [redacted] went over the circuits utilized in the power line carrier system, and, where possible, declassified certain subassemblies so that the work could be done in the open. It was felt this was necessary in order to facilitate the progress of the contract since the operational requirement for these devices is urgent. Essentially, this means that the amplifier, power supply, and acoustical elements in both units will be built up as unclassified sub-sections. Work on the RF portion and the control system for the devices will be done under the usual security procedures.

50X1

c. [redacted] was questioned briefly on the possibility of his plant bidding on some development work for body transceivers and belt antenna systems. He felt that this kind of work could easily be handled at his plant and at the proper time he will submit a proposal.

50X1

d. [redacted] took back to Washington PSQ's on the key people who will be concerned with this project. TSS/SOO will hold these forms pending a decision from APD re approval of the RRC proposal. At that time, every effort will be expended towards expediting the handling of the PSQ's by Security.
